

Why Malarkey?

First to launch SBS modified (rubberized) asphalt shingles

- 1) Up to 35% greater tear strength than industry standard
- 2) Up to 65% greater granule adhesion than industry standard
- 3) Up to Class 4 hail impact rating (highest rating possible)

First to engineer a larger nailing area

- 1) Up to 2X wider nailing area than standard shingles
- 2) Improved installation speed
- 3) Improved nailing accuracy

First to use upcycled rubber, plastics, & smog-reducing granules

- 1) Each roof diverts the equivalent of ~5 tires from the landfill.
- 2) Each roof diverts the equivalent of ~3,200 plastic bags from the landfill.
- 3) Each roof fights emission air pollution like planting ~2 trees.

Malarkey Shingles stand out as the ultimate choice for residential roofing, seamlessly blending durability, aesthetics, and a profound commitment to sustainability. Crafted with a dedication to environmental responsibility, Malarkey Shingles are at the forefront of roofing innovation by incorporating recycled tires and plastics into their manufacturing process. This not only contributes to waste reduction but also reflects Malarkey's dedication to eco-conscious solutions. With a legacy rooted in craftsmanship and a forward-thinking approach, Malarkey has harnessed the power of recycled materials to create shingles that not only withstand the most challenging weather conditions but also embody a tangible commitment to a greener future. Homeowners seeking roofing solutions that are not only resilient and visually appealing but also environmentally conscious will find Malarkey Shingles to be the epitome of excellence in sustainable residential roofing.
